DETAILED ACTION

1. The Amendment filed by Applicant on 12/22/2008 has been entered.

Response to Amendment/Arguments

2. Applicant's amendment and arguments filed on 12/22/2008 have been fully considered and they are found persuasive.

3. The rejection of Claims 1-20 under 35 U.S.C. 102(b) as being anticipated by Holy et al., EP 0 552 876 (hereinafter "Holly") is withdrawn.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Art Unit: 1796

5. Claims 8-16 and 21-24 are rejected under 35 U.S.C. 102(e) as being anticipated by Campbell et al., US 2002/0091207 (hereinafter "Campbell"). Campbell teaches a method producing a vinyl based polymer comprising continuous feeding monomers and solvent to a first reactor starting polymerization at a temperature and retention time within the claimed invention. See Campbell, Abstract; 0031-0032; Examples. Campbell further teaches feeding a polymerization initiator and reaction mixture of first reactor into a second reactor at a different temperature than the first reactor. See Campbell 0018-0019, 0022, 0077-0081. Campbell further teaches in the examples portion solvents mentioned in the claimed invention and amounts of initiator mentioned in the claimed invention. See Campbell, Examples 1-10. The Examiner contends that Campbell anticipates the present claims by teaching the vinyl-based polymer and processes of the claimed invention.
